Professional Summary

AI Product Manager with 7 years of experience leading end-to-end product strategy and cross-functional delivery across EdTech, SaaS, and B2B/B2C digital products, leveraging AI tools and LLMs (including Claude) to accelerate development and drive KPI-led growth.

Professional Experience

AI Product Manager — Ashrhly.com *June 2025 - Present | Part-Time*

- AI-Powered EdTech Platform built using Claude and a single engineer, demonstrating AI-augmented, lean product development.
- Spearheaded end-to-end product development, platform execution, and venture growth of an AI-powered tutoring platform from concept to launch.
- Led cross-functional squads across Engineering, Design, and Operations to build scalable digital solutions from scratch.
- Formulated and executed comprehensive product roadmap, successfully launching the platform from the ground up.
- Translated business objectives into scalable AI product initiatives, optimizing AI engine pipelines and tutoring features.
- Defined and monitored critical platform KPIs, delivery milestones, and growth metrics to drive post-launch scaling.
- Led continuous product discovery and feature prioritization, managing technical evolution of the ecosystem.

Product Manager — Inkrypt Videos *July 2025 - June 2026 | Estonia, Remote*

- Directed cross-functional sprints from ideation through release, aligning Engineering, Design, and Customer Support to deliver video-security enhancements that improved client satisfaction and platform integrity.
- Collaborated with the engineering team to implement encrypted data protection for live-stream content, coordinating QA to validate end-to-end security.
- Gathered and analyzed user requirements, translating insights into actionable technical specifications for analytics features; used Agile and Jira to manage backlog prioritization.
- Led development of a delay-prevention feature enabling clients to predict optimal upload times for on-schedule video availability.
- Tested and implemented micro-processing features with the engineering team, supporting performance and reliability improvements.

Session Lead — Udacity | DECI - Digital Egypt Cubs Initiative with The Egyptian Government *August 2022 - January 2026*

- Delivered 100+ virtual STEAM lessons in Computer Fundamentals, AI, and Python programming across multiple student levels over 3 years.
- Designed and implemented hands-on coding and electronics projects, improving student engagement and practical learning.
- Conducted weekly assessments with structured feedback.

Product Manager - Collaborating on Government Project — Fira.Ai *January 2024 - May 2025 | Saudi Arabia, Remote*

- Managed projects from proposal to delivery, designed pipelines for team management, and implemented technology solutions for government projects with strict compliance requirements.
- Provided consultation and product management expertise for Matterport technology integration, including a custom web application that enhanced usability and functionality.
- Utilized Jira for comprehensive task tracking and management, streamlining communication and optimizing workflow efficiency across multidisciplinary teams.

Product Manager — AlaFein Application, Gazebo Productions *August 2023 - January 2025 | Cairo, Egypt, Hybrid*

- Owned complete product lifecycle for AlaFein B2C arts and culture events platform, leading product strategy from discovery through launch and iteration for an iOS/Android app with administrative dashboard.
- Conducted product discovery using user research and market analysis, defining roadmap and prioritizing features based on data insights, resulting in 30% user acquisition growth and 45% increase in event booking conversions.
- Led cross-functional teams of 8 across engineering, design, and operations over a 12-month development cycle, implementing Agile with Jira and Slack to achieve 99.5% platform uptime for 200+ organizers and artists.

Product Manager — SAKINA *February 2024 - October 2024 | Dubai, United Arab Emirates, Hybrid*

- Led end-to-end product development for a B2B Islamic tourism platform with cloud-based dynamic dashboard, owning product vision and strategy for a VIP travel experience management system.
- Managed product discovery and stakeholder alignment across engineering, design, and business teams, delivering an integrated booking system that increased booking efficiency by 40%.
- Drove roadmap execution balancing commercial priorities with user needs, implementing CMS and real-time availability features that improved platform engagement by 35% across 50+ travel partners.

Product Manager — Awasis.ai *August 2021 - August 2024 | United Arab Emirates, Remote*

- Led product strategy and lifecycle management for diverse B2B and B2C digital products including AI-powered educational platforms, e-commerce solutions, mobile apps, and VR experiences, maintaining Top Rated Plus status within Upwork's top 3% globally.
- Owned product discovery and stakeholder management for international clients across Germany, Netherlands, Jordan, Dubai, Egypt, and Saudi Arabia, increasing client retention by 60%.
- Defined and executed product roadmaps for AI-driven educational robotics products, achieving 95% client satisfaction and 40% year-over-year revenue growth.
- Established product-first business model with flexible pricing strategies, driving commercial success with 50+ enterprise clients.
- Delivered SaaS maintenance and support frameworks, ensuring continuous product improvement for educational technology serving 10,000+ end users.

Python Developer - SaaS Modernint (Linker Product) *January 2023 - December 2023 | Saudi Arabia, Remote*

- Developed Linker Product using Python to automatically apply for LinkedIn job postings, resulting in a 40% increase in job application efficiency.
- Streamlined company decision-making by developing advanced analytics reporting tools in Python, increasing operational efficiency by 30%.

Junior Python Developer — Peakregroup *August 2022 - January 2023 | United States, Remote*

- Designed a product for scraping real estate data from U.S. states using Python, cleaning and formatting data for input into Google Sheets.
- Leveraged Power BI to develop dynamic data visualizations, enhancing quarterly business report accuracy by 35%.

Python Instructor — almentor *July 2021 - March 2022 | Cairo, Egypt*

- Developed beginner-level Python curriculum using instructional design principles, incorporating interactive coding exercises with NumPy and Pandas.
- Guided students through a structured learning path, monitoring progress and providing targeted feedback.
